Survey Science and Technology of Foundry
Express Information at Home and Abroad

As an official transaction of Foundry Institution of Chinese Mechanical Engineering Society (FICMES), FOUNDRY Journal (monthly, edited in Chinese) started publication in 1952. It covers the whole fields of foundry technologies for iron, steel and non-ferrous casting including sand casting, die casting and other special casting, etc. It mainly reports advanced scientific and technological achievements, applied technologies, production and management experiences, recent development and information at home and abroad, and advertises for both Chinese and foreign manufactures. Its great advantages of information are profound, rich and broad.
